Response
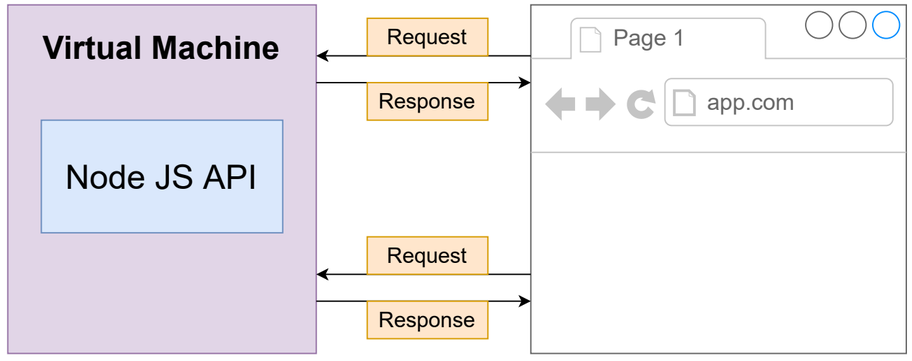
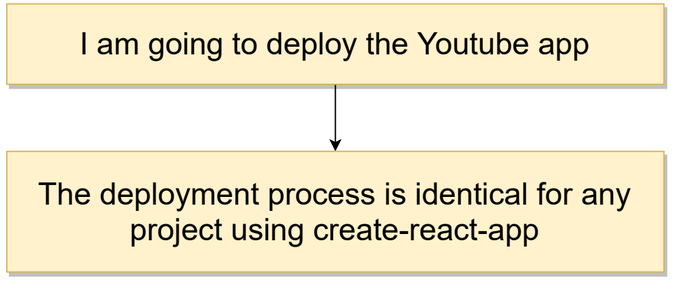
bundle.js
Page 1
app.com

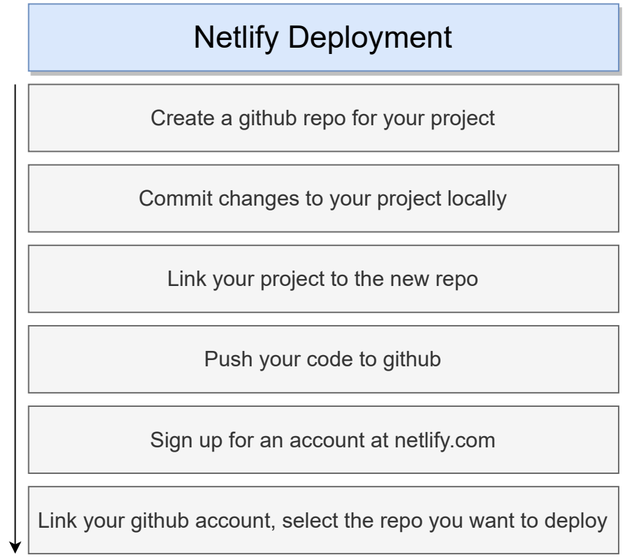
We don't need a full VM, as we are *not executing any code*





I am going to deploy the Youtube app
The deployment process is identical for any project using create-react-app

Vercel Deployment
Sign up at vercel.com
Install the Vercel CLI
Run 'vercel' in our project directory



Netlify Deployment
Create a github repo for your project
Commit changes to your project locally
Link your project to the new repo
Push your code to github
Sign up for an account at netlify.com
Link your github account, select the repo you want to deploy
